- Post Processing -

SOFTWARE

EDUCATION

(BA Hons) Visual Effects -
Futureworks Training Ltd (2018-2021)

(Level 3 BTEC) Interactive Media
Extended Diploma - Trafford
College (2016-2018)

9 GCSE's (2013-2016)

PROFILE

A passionate, driven, hardworking 3D Visual Effects Artist. Motivated to learn new software, willing to go the extra mile to meet deadlines. Consistently exceeds expectations and has vast knowledge of the industry despite being so early in his career. Has been motivated to reach out to other VFX studios and has gained valuable experience. Eager to start working with a creative team and provide fresh ideas to new and exciting projects.

Despite having skills in a wide range of departments, 3D Modelling and lighting is a true passion. Learning how to arrange polygons to create a beautifully modelled 3D asset with flawless topology and then rendering it with a stunning lighting setup is truly addicting.

I hope this has convinced you I am truly passionate about this industry and I am grateful you took the time to read this.

EXPERIENCE

BOARDWALK STUDIOS - 2018

This unpaid work experience showed me what it's like to work amongst industry professionals. They valued my opinion and were constantly bringing me in meetings asking what I thought about their work. They gave me a task to complete which was a part of one of their client projects, although it was difficult, I pulled through and had to learn an entirely new software in one week (Cinema 4D).

PLANET IE - 2017

This Architectural Visualization Studio based in Altrincham brought me in for three days and gave me an old job they worked on. I had to create an exterior scene using 3DS Max and Vray. This project showed me the importance of meeting deadlines. I managed to 3d model an entire exterior scene, arrange the composition, texture, light, render and then colour grade all the AOV's in the three days.

CRESTA BUSINESS TRAVEL - 2019

This one-week paid work was for a travel agency. They hired me to create a series of tutorials for a program they use to book flights. The tutorials were then used for new employees to learn their booking system. I used Adobe After Effects to create simple yet clear animations to make the tutorials easy to follow and I edited the videos together using Premiere Pro. The whole project was strictly 2D animations.

HOBBIES AND INTERESTS

In my time away from work I like stay active and engage in physical activities. Downhill mountain biking is one of those activities and just cycling in general is fun. I love to make music, specifically electronic dance music and I'm currently in the process of learning how to DJ. I'm also a huge movie buff.
